CCS Demonstration Update
April 23, 2012

CCS Demonstration

Purpose

Test innovative health care delivery models for transforming health care services for children with CCS conditions

Objective

Identify the model or models that will result in a well-integrated, coordinated and value-based health care delivery system

Demonstration Models

Existing Medi-Cal Managed Care Plans

Enhanced Primary Care Case Management

Specialty Health Care Plan

Provider Based Accountable Care Organization

Core Program Requirements

- Family Centered Care
- Comprehensive Care (no carve out)
- Scope of Services
- Enrollment
- Consumer Protections
- Evaluation Participation
- Maintaining regionalized provider network

Challenges to Start Up

- Acceptance of Reimbursement Rates
- Ability to Meet All Readiness Requirements
- CMS Approval of Contracts
- Data Sharing

Project Evaluation

- Improvement in care coordination
- Improvement in quality of care
- Reduction in rate of growth in spending
- Improvement in the value or cost effectiveness of care
- Improvement in patient and family satisfaction
- Improvement in provider satisfaction
- Change in the distribution of mix of services (reduction in ER and inpatient services and increased use of community based services)

Project Evaluation
